Election/Restrictions

Applicant's election of Species A, claims 1-7 and 44-47, in the reply filed on 21 January 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

This application is in condition for allowance except for the presence of claims 8-43 to a species non-elected without traverse. Accordingly, claims 8-43 have been cancelled as per the Examiner's Amendment below.

EXAMINER'S AMENDMENT

The Title of the invention has been changed by the Examiner to --VOLTAGE BOOSTING CIRCUIT WITHOUT OUTPUT CLAMPING FOR REGULATION--.

The following changes were made in the claims:

Claims 8-43 have been cancelled.

STATEMENT OF REASONS FOR ALLOWANCE

Many of the cited prior art references disclose clamping the positively or negatively boosted voltage responsively to the level thereof.

With respect to claims 1-7, none of the cited prior discloses the specific combination of elements recited in the claims wherein the "voltage variation detection circuit" generates a "reference current equivalent to current occurring due to the potential difference between the first input (output of the boosting circuit) and the second input (power source) being made to flow into the third input (ground)".

With respect to claims 44, 46 and 47, none of the cited prior discloses the specific combination of elements recited in the claims further including two "external voltage applying

circuits" each responsive to a corresponding "external voltage", the "external applied voltage" and the "power source voltage".

With respect to claims 45, 46 and 47, none of the cited prior discloses the specific combination of elements recited in the claims further including two "level shift circuits" each responsive to the corresponding "boosting circuit" and a voltage form the corresponding "external voltage applying circuit".

Therefore, claims 1-7 and 44-47 are deemed in condition for allowance.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terry Cunningham whose telephone number is 571-272-1742. The examiner can normally be reached on Monday-Thursday from 7:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy P. Callahan can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
